

**FSNS Food Safety Conference and Lab Grand Opening – Wednesday, July 13th**

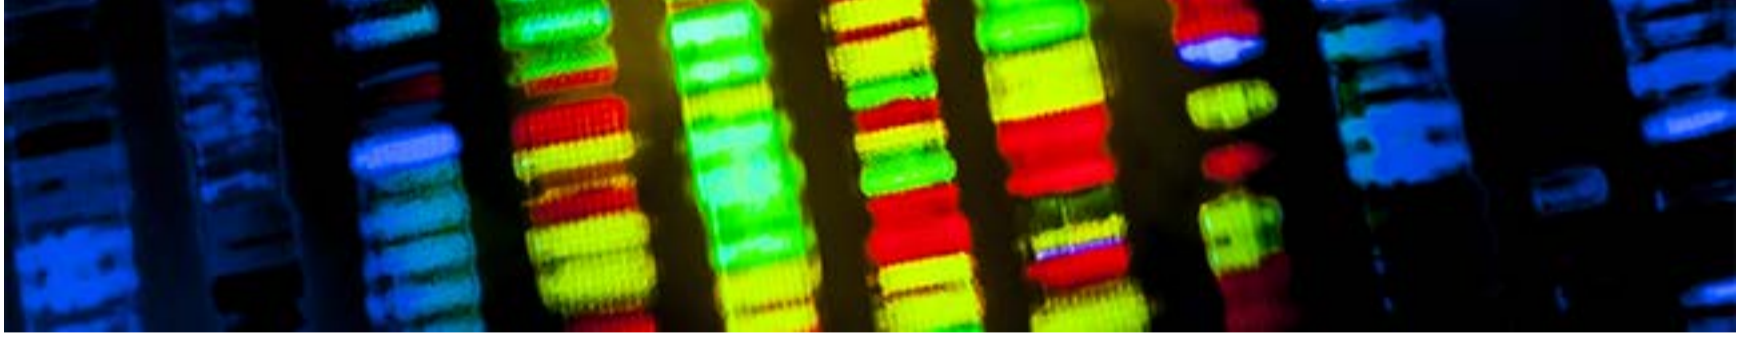

Did you hear? We're very excited to announce our newest Lab in Amarillo, Texas, and would like to invite you to the FSNS Food Safety Conference followed by the Lab Grand Opening Reception and Book Signing by Dr. Temple Grandin, one of our featured speakers! Email us at [marketing@FSNS.com](mailto:marketing@FSNS.com) for more information.

**From Offense To Defense: Chipotle's Saga**

Read how Chipotle has gone from playing offense to playing defense as the chain "took its eyes off of the ball" by focusing too much on fresh, natural, local production, sustainability, and non-GMO ingredients—and not nearly enough about food safety.

**Whole Genome Sequencing: An Emerging Technology with Applications That Will Dramatically Impact the Future of Food Safety**

Whole Genome Sequencing (WGS) is transitioning from being an industry buzzword into being a common household term. This article covers how to prepare for this technology, how it will impact the industry, and how, by applying WGS to food production systems, we will achieve our goal of making the food supply safer for the consumer.
